

The aesthetic that I chose to go for was a pixelated and modern clicker game where players feel almost warm or comforted.

I used many free sci-fi/retro 8-bit assets, but ideally I would find more fitting themed buttons that fit the apartment theme more. Right now they are just pixelated blocks with a similar color scheme.

Assets I was able to find:

- Background (Apartment theme)
- Background (Space/sky theme)
- Futuristic Font
- Pixelated Button
- Pixelated Bar (Used for text background)
